PART 5. PROJECT IMPACTS AND THEIR MAGNITUDE

GENERAL INFORMATION: In completing this part, the reviewer should be guided by the question: Have my responses and determinations been reasonable? The reviewer is not expected to be an expert environmental analyst.

1. Identifying that an effect will be potentially large (column 2) does not mean that it is also necessarily significant. Any large effect must be evaluated in PART 6 to determine significance. By identifying an effect in column 2 simply asks that it be looked at further.
2. The Examples provided are to assist the reviewer by showing types of effects and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site, other examples and/or lower thresholds may be more appropriate for a Potential Large Impact rating.
3. The impacts of each project, on each site, in each locality, will vary. Therefore, the examples are illustrative and have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
4. The number of examples per question does not indicate the importance of each question.
5. In identifying impacts, consider long-term, short-term and cumulative effects.
6. Answer each of the 19 questions in this part. Answer Yes if there will be any effect.
7. Maybe answers should be considered as Yes answers.
8. If answering Yes to a question, the check the appropriate box (column 1 or 2) to indicate the potential size of the impact. If impact threshold equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
9. If reviewer has doubt about the size of the impact, consider the impact as potentially large and proceed to PART 6.
10. If a potentially large impact or effect can be reduced by change (s) in the project to a small to moderate magnitude, place a Yes in column 3. A No response indicates that such a reduction is not possible. This must be explained in PART 6.
